Welcome to the World of Sapphire

Discover the latest in innovation and design technology that was developed specifically for you and built to adapt to your environment. Sapphire's complete product line with detailed design, precise integration and unsurpassed performance sets a new standard in built-in undercounter ice-making and cooling products.

Sapphire is the newest addition to The Legacy Companies (TLC) portfolio of residential and commercial brands. TLC, a global leader based in Florida, is beyond equipped to tackle the challenges faced with integrated installation, flexibility and design which had not been resolved. Our development team consisted of five industry leaders from the undercounter ice machines and refrigeration product segment. Our observation was clear: The market doesn't need just "another" undercounter product. Most brands have treated the built-in undercounter segment as a filler to a line of appliances with limited innovation and thought. In many cases, the product is sourced from factories based on what they already produced.

The result: Sapphire. A product that not only exuded beauty and a refined look but also worked seamlessly into any environment and situation. Sapphire was created to be a leader in the industry – not just another brand extension, but a singular line that was entirely focused on what it takes to be the best in the undercounter space. Designing, engineering and manufacturing our product in our own factory!

With all the aspects of development and manufacturing under one roof, the Sapphire family of products works perfectly for the cook, the craft cocktail maker, entertainer and family for installation indoors, outdoors or ADA height applications.

The attention to design detail is evident from top to bottom, inside and out. From the beautiful signature Sapphire blue interior, seamless integration, door and handle design, shelves and bins, elegant lighting, Sapphire's precious elements are unmistakable.

For more stunning details, see each product page for further highlights.

Superior engineering and designed for luxury, your entertainment is effortless with Sapphire Appliances. Whether indoors or outdoors, Sapphire Appliances keep you cooler faster.

Service for your Sapphire Appliance:
sapphire@adcosservice.com

Series 3 Designed to Deliver the Fit & Feel of a Premium Undercounter Product without the Premium Price.

Specific Engineering and design deliver a product with the attributes that meet the premium install and performance space but the feature and price level of a mass premium product.

OUT OF SIGHT, OUT OF MIND

Simple controls with loads of function. 4 Buttons with LED display shows set and actual temperature along with alert codes and the ability to run self-diagnosis, all while remaining out of sight.

HINGES ARE O' SO SLICK

Installs like a cabinet - no air gap needed with front breathing system resulting in a flush zero clearance installation.

LET IT SLIDE

Full extension shelves with stainless steel fronts allow for easy storage and visibility of all of your bottles, cans or other items.

LIGHTS, CAMERA, ACTION

Strategically located to supply a Cool White LED light to showcase the contents of your Beverage/Wine Center or Refrigeration unit with 2 top/front mounted LED light bars.

YOUR PLACE OR MINE

Shelves are adjustable with 9 different locations to adapt to various bottle and can sizes. Adjustable for today or tomorrow if your storage needs change.

THE BOTTOM IS AS IMPORTANT AS THE TOP

Thoughtfully designed 304 Stainless Steel fixed toe kick matches perfectly with door design and allows easy install with a clean finished appearance, set back to function like a cabinet toe kick.

THE TEMPERATURE IS RIGHT

provides fast cool down and maintains even temperature. Sapphire's cooling system is engineered with a powerful compressor, twin condenser motor fans, optimized wind route system and vortex technology to achieve fast cool down and even temperature resulting in an extremely energy efficient operation.

Series 5 Make Entertaining Easy With Sapphire's Superior Performance.

Superior engineering and designed for luxury, your entertainment is effortless with Sapphire Appliances. Whether indoors or outdoors, Sapphire Appliances keep you cooler faster.

EASY-TO-USE ELECTRONIC CONTROL SYSTEM actively manages your ice-making and refrigeration systems. In addition to normal control functionality, you can easily manage lighting and hours of operation.

ADAPTABLE CANTILEVERED RACKING SYSTEM allows you to choose from multiple locations and interchangeable inserts.

THE LED THEATER LIGHTING illuminates through the shelves and/or racks, allowing you to clearly see what is inside.

WITH MULTIPLE RACK LOCATIONS, the racking system allows you to choose from wine racks, tempered glass shelves or/and chrome-plated wire shelves if out of the box configurations are not ideal for your current needs.

ADAPTABLE GRILLE DESIGN allows meticulous alignment with adjacent cabinetry and the option to design a continuous cabinet toe kick.

UNMATCHED INTEGRATION complemented by full stainless cabinet/ exterior and articulating hinge provides precise zero-clearance installation.

TEMPERATURE MANAGEMENT & RECOVERY provides fast cool down and maintains even temperature. Sapphire's cooling system is engineered with a powerful compressor, twin condenser motor fans, optimized wind route system and vortex technology to achieve fast cool down and even temperature resulting in an extremely energy efficient operation.

The Right Fit.

Select Sapphire models are sized and engineered to allow precise zero clearance for flush installation for unmatched integration into a standard 24" depth cabinet in any inset, frameless or overlay face-framed style cabinetry. This is accomplished by designing products to the same measurements as cabinet dimensions. Combine articulating hinges, adjustable toe kicks, panel-ready models and you have a product that will precisely and seamlessly install into your cabinets and design lines.

Select Sapphire products are panel-ready for your $\frac{3}{4}$ " custom door panel and handle. They include an adaptable grille design which allows meticulous alignment with adjacent cabinetry and the option to design a continuous cabinet toe kick. If a stainless-steel finish is a design requirement, these models will also precisely install within your cabinetry and toe kick, creating their own fashion statement.

Sapphire Panel-Ready products allow for adding a panel or frame of up to 25 lbs. (more than any other competitor).

Fits like a Cabinet, Not an Appliance.

ICE MACHINES

The Legacy Companies' decades of commercial and restaurant-style ice machine innovations are now available for the residential marketplace. Sapphire offers four different ice types, producing up to 80 pounds of restaurant-quality clear, nugge or crescent ice per day, allowing you to select which ice type fits your lifestyle.

Indoor | 15" Countertop Crescent Ice Maker

Series 3

- Produces up to 20 lbs of ½" x ⅞" x 2 ⅝" crescent cubes per day
- Removable ice storage bin holds up to 15 lbs of crescent cubes
- Clear ice scoop and storage hook included
- Matte black prepainted cabinet exterior
- Black interior
- Countertop design or built-in with appropriate air gap
- Stainless steel door includes a 1" diameter stainless steel handle with faceted standoffs
- Easy-to-use On/Off control toggle switch
- Covered by the Sapphire Two-Year Parts & On-Site Labor and Five-Year Compressor Parts Only Limited Warranty
- Top mounted pin hinge
- Auto shut-off when ice bin is full
- Manual Defrost
- No Drain Required
- Longterm Ice Storage

Gourmet

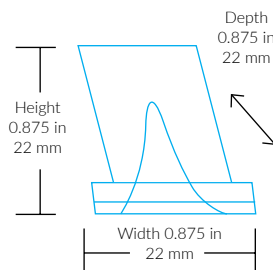

Full Dice

Crescent

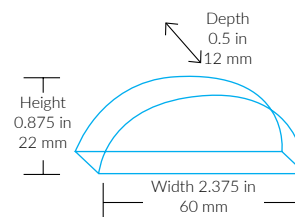

Nugget

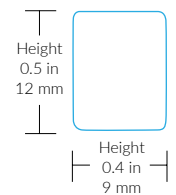

Gourmet ice is formed on a horizontal mounted evaporator. Water is sprayed across the evaporator surface freezing in thin layers allowing impurities to fall and fresh water to freeze. Gourmet Ice Machines make 24 individual cubes per harvest every 27 minutes with daily production of up to 68lbs of ice or 1,296 Cubes. Ice machines require plumbed water and a drain to expel the melting ice and impurities. Ice machines are not freezers and do not store ice long term.

Full Dice or Slab ice is made in a sheet of ice cubes. The water flows across the vertical mounted evaporator to freeze in thin layers allowing impurities to fall and fresh water to freeze. Full Dice Ice Machines make 40 cubes per sheet per harvest every 20 minutes with daily production of up to 75lbs of ice or 3,000 Cubes. Ice machines require plumbed water and a drain to expel the melting ice and impurities. Ice machines are not freezers and do not store ice long term.

Crescent Ice is made by water filling into an ice mold. Cold air is circulated around the mold causing the ice to freeze omnidirectionally. This method of making ice traps impurities in the center of the ice which produces ice with bubbles and a cloudy appearance. Crescent Ice Machines make 10 cubes per cycle approximately every 30 minutes with daily production of up to 25lbs of ice or 250 Cubes per day. Crescent cubes are made in freezers and provide long term storage.

Nugget Ice is made with a cylindrical reservoir evaporator system. The water freezes and is scraped and mixed with cold water in a slurry that is forced through small holes to make the nugget shape out of the slurry. The ice is then pushed out into the bin. The Nugget Ice Machine will make 80 lbs of ice a day. Ice machines require plumbed water and a drain to expel the melting ice. Ice machines are not freezers and do not store ice long term.

REFRIGERATORS

Perfect for your kitchen, bar, gym, home theater or outdoor entertainment area, Sapphire offers both 15" and 24" width solid door refrigerator models for inside or outside the home.

With slide-out, full extension, easily adjustable glass or chrome wire shelf inserts and clear storage bins, Sapphire units offer maximum storage optimization on select models.

- Industry first Stainless-Steel Panel Ready Door – Easily convert SS to Custom Panel option
- Indoor or Outdoor Installation ready
- Precise zero clearance design allows for integration into any built-in application
- Volume of 5.5 cubic feet, holds (219) 12 oz cans or (107) 12 oz bottles
- Matte black prepainted cabinet exterior
- Black interior
- Electronic control with LED display
- Temperature range: 34 °F to 65 °F
- Fan-assisted cooling system allows for even temperatures, quicker cooldown times, and added efficiency
- Cool white LED lighting
- Adaptable racking system includes 3 glass shelves
- Unit ships right hinged with field-reversible doors
- 4 Independent adaptable leveling legs

WINE REFRIGERATORS

Help safeguard your wine and store up to 56 standard 750 ml bottles in a Sapphire Wine Refrigerator.

All facets were considered while designing and engineering the Sapphire line. The adaptable cantilevered racking systems and wine rack inserts in select models accommodate even the most unique-sized bottles in your wine collection. Virtually vibration-free operation alleviates any unwanted cavitation and Argon-filled UV-coated glass front doors protect your wine from light damage. Finally, the temperature control system maintains your wine for proper storage, maturation and integrity. Cheers!

Space Management. Life Changes. Accessibility.

Accessorize your Sapphire. The ability to manage a variety of wine bottles and can sizes in addition to other storage needs is at the forefront of Sapphire design. Select Sapphire models have been engineered with cantilevered racking systems and interchangeable inserts, making it easy to adapt for your current food and beverage storage needs as your preferences evolve over time.

With multiple rack locations, the racking system allows you to choose from wine racks, tempered glass shelves and chrome-plated wire shelves if out of the box configurations are not ideal for your current needs. Of course, as your food and beverage demands change, you can adapt your unit with the appropriate racks and insert accessories to fit your new needs.

All racks and shelves are full extension glide-out – making access to your food and beverage items easy and convenient, even if items are hidden in the back. The LED lighting illuminates through the shelves and racks, allowing you to clearly see what is inside.
